DETAILED ACTION

Reasons for Allowance

1. Claims 9-16 are allowed.

2. Examiner's Statement of Reasons for Allowance:

Applicant(s) invention relates to a method for controlled application of a stator current set value and a torque set point value.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant(s) invention differs from the prior art of record by a combination of its functional features, which examiner's search failed to find, specifically, a method for applying a controlled stator current set point value and a controlled torque set point value to a converter-fed rotating-field machine, comprising:

computing a field-forming current component of the stator current set point value as a function of a predetermined rotor flux set point value and a measured actual rotor flux value;

computing a torque-forming current component of the stator current set point value as a function of a predetermined torque set point value, the measured actual rotor flux value and a measured torque-forming current component of a measured stator current;

determining an actual stator angular frequency value as a function of a measured rotor slip frequency and of an angular frequency;

by using a frequency-dependent stray inductance and a stator resistance as parameters, computing the integral the stator voltage as a manipulated variable from the computed values of the field-forming current component, the torque-forming current component, the actual stator angular frequency, and the measured rotor slip frequency; and

deriving from the integral of the stator voltage a flux path curve which is selected from optimized flux path curves stored off-line.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
